## Specify ACRYLITE® AR Abrasion Resistant acrylic sheet for reliable product performance.

This specialty line of ACRYLITE sheet products offers abrasion and chemical resistance for demanding applications where frequent handling, heavy traffic and regular cleaning are commonplace. The added protection of the abrasion resistant coating helps to significantly extend service life. The product is available with coating on one or both sides. While two-side coated sheet provides maximum protection, one-side coated sheet offers economical advantages for applications where only one side of the sheet is exposed. In addition, the uncoated side is ideal for silk-screening.
