

ACRYLITE®
SignFlex™
 acrylic sheet

ACRYLITE® SignFlex™ acrylic sheet, specially formulated for LED sign faces, possesses a frosted appearance and unique optical properties that evenly diffuse light and hide LED hot spots without the use of a diffuser film. The frosted surface also works to hide fingerprints and scratches which helps maintain the service life. This innovative acrylic product offers superior impact and weather resistance and is ideal for both interior and outdoor applications.

Performance formulation offers:

- Excellent diffusing properties; eliminates appearance of LED light pinpoints
- Impact-modified for increased durability
- Enhanced light transmission for brighter signs – design with fewer LEDs for increased cost savings
- Lightweight for reduced freight costs, easy handling and trouble-free installation
- Easy to cut, route, drill and polish

Available in:

- Thickness: .177" (4.5 mm)
- Sizes: 75" x 100" (1,905 x 2,549 mm) 75" x 125" (1,905 x 3175 mm)
- White (WDR58, WDR52)
