The Global Leader in High Performance Plastics

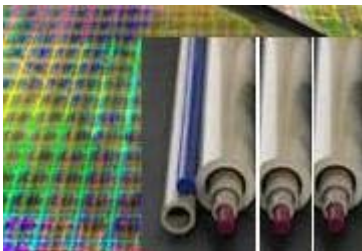

HolograPEEK® XL Holography Compliant Embossing Rollers

For better compliancy, longer roll life, and the ability to refurbish the surface of the roll many times, you should consider using HolograPEEK® XL as your material of choice for your compliant rolls.

HolograPEEK® XL rolls have been used successfully for the production of holographic films, while reducing material costs when compared to more expensive polyimide rollers.

Our rolls offer you the following:

- Long, useable life.
- Performance at high temperatures (480° F continuous service).
- Ability to run at higher pressures than many incumbent materials.
- Superior surface finish to attain high resolution of embossed images.
- Diameters of up to 10" OD with lengths up to 39".

For more information on HolograPEEK® XL contact Professional Plastics, Inc.
