

Kel-F – PCTFE Screws & Fasteners

PCTFE (Kel-F) fasteners includes screws, bolts, thumb screws, cap screws, nuts, washers, spacers, shoulder bushings, screw insulators, threaded rod and many other PCTFE items. PCTFE parts are manufactured to ANSI and DIN standards.

Kel-F - PCTFE (PolyChloroTriFluoroEthylene) Kel F is a fluorocarbon-based polymer and is commonly abbreviated PCTFE. PCTFE offers the unique combination of physical and mechanical properties, nonflammability, chemical resistance, near zero moisture absorption, and excellent electrical properties. These characteristics cannot be found in any other thermoplastic fluoropolymer with a useful temperature range of -400°F to +400°F. PCTFE also has extremely low outgassing, making it well suited for use in aerospace and flight applications.

Custom prints for PTCFE fasteners and components can be sent in all standard formats. Plastic parts manufactured in PCTFE (Kel-F) are used in such industries as Semiconductor, Aerospace, Chemical and Electronics.

- Note: Kel-F® is a registered tradename of 3M Company. In 1996, 3M discontinued manufacturing of Kel-F & today, all PCTFE resin is manufactured by Daikin under the tradename of Neoflon® or by Allied Signal under the tradename of Aclon®. Kel-F is still the most commonly used tradename used to describe PCTFE.
