Plexiglass sheet is a common reference term for acrylic sheets. When spelled as Plexiglas® (one S) it refers to the Arkema brand name. When spelled as plexiglass (two SS's), the user is not being brand specific and is considered to be looking for a generic acrylic sheet. Items offered by Professional Plastics are GENERIC acrylic sheet, not the Plexiglas® brand material. Plexiglas® is a registered trademark of Arkema & is not the brand name typically distributed by Professional Plastics. The color numbers listed above are generally accepted industry color numbers for Plexiglas®. For percentages of light transmission, Acrylite® color number cross-references, and other technical data, please contact Professional Plastics, Inc.
