

KEY FEATURES

- Vertical and horizontal interlocking for fast and secure in-field assembly
- High impact polymers make our spacers highly durable and can easily support heavy loads
- Used in both encased burial and direct burial installations for versatility

Base Duct Spacer

Intermediate Duct Spacer

Vertical and horizontal interlocking duct spacers for fast secure field assembly

Cal Am Duct Spacers have been the choice for contractors for decades. They utilize a proven two-piece design precisely engineered to support duct arrays within trenching before encasement. These sturdy, versatile spacers will not shift under the weight of your workmen and stay firmly in place during fill.

Available in eighteen (18) sizes, Cal Am Duct Spacers accommodate ducts ranging in size from 2.00" – 8.00" | 50mm - 200mm while providing duct separation of 1.50" – 3.00" | 40mm - 80mm. Offering an extensive range of sizing means Cal Am spacers can be tailor-fit to any project—big or small.

Overall, Cal Am Duct Spacers are a reliable and cost-effective solution for any duct placement project. The ease of assembly and resistance to soil conditions and extreme temperatures make Cal Am Duct Spacers a trusted choice for contractors. Their lightweight design makes them easy to handle and transport. In addition, the spacers are environmentally friendly, made from recycled materials, and recyclable. With Cal Am Duct Spacers, contractors can save installation time and reduce costs while ensuring the accurate separation of ducts.

Available in pre-assembled configurations. Please contact us for more information.

Supplied by **Professional Plastics**
