

KEY FEATURES

- Fits Schedule 40 & 80 and EB and DB conduits
- Available in eleven (11) sizes
- Installs in seconds, no tools required
- Warp resistant, durable design
- For encased and direct burial applications

PVC End Cap

PVC Riser Cap

Available in two styles, PVC End Caps and Riser Caps are perfect for securing conduit openings

Our line of conduit end caps, available in sizes ranging from 0.50" to 6.00", are manufactured in accordance to industry standards. The injection molding process creates a consistent, repeatable fit for easy installation.

Also manufactured in a Riser Cap design, this variation comes with a convenient rope-tie loop secured to the underside of the cap. This rope-tie feature makes mule tape or other line easy to tie-off and readily at-hand for future use.

Produced from high-impact Polyvinyl Chloride (PVC) using state-of-the-art manufacturing techniques, you will find that these products offer excellent lot-to-lot consistency, smooth walls, and a durable, warp-resistant design for simple installation.

Supplied by **Professional Plastics**
