

**Master Distributor of STA-DOWN™ CONDUIT RETAINING DEVICES**

★ ★ ★ ★ ★  
**STA-DOWN™**  
NON - METALLIC  
CONDUIT RETAINING DEVICE  
MADE IN AMERICA  
EASIER • SAFER • MORE ECONOMICAL

Patented Type 1 and Type 2 non-metallic **STA-DOWN™ CRD** can be used with all manufactured chairs, spacers, racks or grids. Both CRD's are made entirely of injection-molded polypropylene plastic making underground electrical conduit installations safer, easier and more economical. **STA-DOWN™ CRD's** unique designs are easily inserted into the ends of 1-1/2" schedule 40 PVC conduit, saving an average of 25-28% less labor in the field.

**STA-DOWN™ CONDUIT RETAINING DEVICE** is recognized as the most innovative, safe and practical means of securing PVC conduit in a trench while being encased in concrete/slurry saving contractors both time and money. Our conduit retaining device is made entirely of injection molded polypropylene plastic to uphold against extreme conditions; **STA-DOWN™ CRD** is guaranteed to secure your underground utility lines.

**STA-DOWN™ CRD** can be used with any chairs, spacers, racks or grids.
