**NORPLEX
MICARTA**

What is G-10?

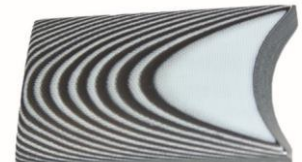

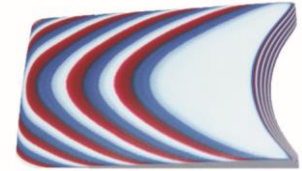

G-10 (jè - /ten/)

noun:

- 1) composite material type described in electrical industry standards
- 2) a fiberglass epoxy material in sheet, tube, and rod form

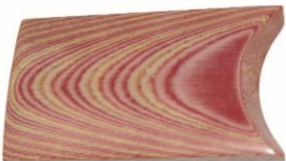

adjective:

- 1) used to describe many Micarta® like materials reinforced with carbon fiber, glass fiber, and other synthetic materials with epoxy resin
- 2) laminated composite materials that are very hard, strong and with vibrant color combinations and unique surface textures

Why UlteX™ G-10 by Norplex-Micarta

- Manufactured in Postville, Iowa by a team of professionals
- UlteX™ G-10 is produced to the highest standards in the industry
- Optimized for aesthetic applications for items such as knife handles, gun grips, inlays, and other cosmetic uses
- Offered in dozens of colors, combinations and surface finishes

What is Micarta®?

Micarta® (my-kär-tä)

noun:

- 1) a composite material often made from natural reinforcements such as canvas, linen and paper with a phenolic resin
- 2) a brand name and registered trademark of Norplex-Micarta

adjective:

- 1) to describe a composite material that is tough, long-lasting and good looking
- 2) a layered or woven pattern in a composite sheet

Why UlteX™ Micarta® by Norplex-Micarta

- Manufactured by Norplex-Micarta in Postville, Iowa
- Produced to the highest quality and service standards in the world
- Micarta® is available in sheet, tube and rod form
